EDUCATION

Bachelor of Computer Science

B.C.Sc (Computer Science)

2019 - 2025

LANGUAGE

- Burmese (Native Language)
- English (Intermediate)
- Korean (Level 2)
- Japanese (N4)

FRONTEND

- HTML5
- CSS3
- JavaScript
- Bootstrap
- Tailwind CSS

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building scalable business applications using Laravel, PHP, ASP.NET, and modern frontend technologies. Experienced in designing RESTful APIs, optimizing database performance, implementing secure authentication systems, and deploying applications using Docker and cloud infrastructure. Contributed to the development of training, library, and employee management platforms, focusing on maintainable architecture, system performance, and clean code practices. Currently expanding expertise in ASP.NET Core and enterprise software development.

WORKING EXPERIENCE

ITVisionHub Company Limited (Full Stack Developer)

- Engineered scalable web applications using PHP, Laravel, React.js, ASP.NET, and Livewire with a focus on performance, maintainability, and clean architecture
- Designed and implemented RESTful APIs supporting modular business workflows and seamless integration between internal system components.
- Implemented secure authentication and authorization mechanisms using Firebase, JWT, and role-based access control (RBAC)
- Optimized MySQL queries, indexes, and database schema design, improving application response times and reducing system load during peak usage.
- Built responsive and user-friendly interfaces using modern frontend technologies
- Streamlined deployment workflows by implementing CI/CD pipelines using Git and GitHub
- Containerized applications using Docker to ensure consistent development and production environments
- Conducted code reviews and collaborated with junior developers to improve code quality, maintainability, and development efficiency.

BACKEND

- PHP
- Laravel
- C# (ASP.NET)
- RESTful APIs
- Authentication (JWT, Sanctum)
- Validation & Middleware

DATABASE

- MySQL (Advanced)
- MSSQL (Basic)

DEVOPS & TOOLS

- Digital Ocean (Deployment & Server Management)
- GitHub
- VsCode
- Postman
- Figma

HOSTING & CLOUD

- Docker
- GitHub Pages

SOFT SKILLS

- Strong Communication
- Negotiation Skills
- Problem-Solving
- Strong Time management

PROJECT SUMMARY

Training Management System (TMS)

Description:

Designed and developed a centralized training management platform for course scheduling, enrollment, attendance tracking, assessments, and reporting.

Tech Stack : HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, PHP, Laravel, MySQL, Docker, GitHub.

Key Contributions:

- Designed system architecture using N-Tier Architecture and MVC principles.
 - Developed RESTful APIs and backend modules using Laravel.
 - Optimized database queries and schema structure for improved reporting performance.
 - Implemented Docker-based deployment workflows for environment consistency.
 - Built administrative dashboards for training management and analytics.
-

Library Management System (LMS)

Description:

Developed a digital library platform to automate catalog management, member registration, book lending, and inventory tracking.

Tech Stack : HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, PHP, MySQL, Docker, GitHub.

Key Contributions:

- Designed scalable database architecture for managing large book inventories.
 - Implemented search and filtering functionality to improve information retrieval.
 - Optimized query performance for high-volume catalog operations.
 - Developed responsive administrative interfaces for librarians and staff.
-

Employee Management System

Description:

Developed an employee management platform for HR operations, including employee records, leave management, and role-based access control.

Tech Stack : HTML5, CSS3, JavaScript, Bootstrap, ASP.NET, MySQL, Docker, GitHub.

Key Contributions:

- Built secure backend modules using ASP.NET MVC and Entity Framework.
- Implemented RBAC authorization to control employee and administrator access.
- Designed HR dashboards for employee tracking and operational reporting.
