MI MI KHAING LIN

SENIOR FULL-STACK DEVELOPER

Yangon, Myanmar | +959-441-386-934 | mimikhainglin70@gmail.com | linkedin | other

PROFESSIONAL SUMMARY

Highly motivated Full-Stack Developer with expertise in Laravel, PHP, ASP.NET, React, and React Native, adept at building scalable business applications. Proven ability to develop and optimize RESTful APIs and secure authentication, delivering robust solutions for training, library, and employee management systems. Committed to clean code, performance, and enterprise software development, currently advancing skills in ASP.NET Core.

WORK EXPERIENCE

Senior Full Stack Developer,ITVisionHub Company Limited — May 2026 - Current

- Engineered scalable web applications using PHP, Laravel, React, React Native ASP.NET, with a focus on performance, maintainability, and clean architecture
- Implemented secure authentication and authorization mechanisms using Firebase, JWT, and role-based access control (RBAC)
- Optimized MySQL queries, indexes, and database schema design, improving application response times and reducing system load during peak usage.
- Built responsive and user-friendly interfaces using modern frontend technologies
- Streamlined deployment workflows by implementing CI/CD pipelines using Git and GitHub
- Conducted code reviews and collaborated with junior developers to improve code quality, maintainability, and development efficiency.

Full Stack Developer,ITVisionHub Company Limited — Jun 2025 - May 2026

Yangon

- Developed and deployed full-stack web applications utilizing PHP, Laravel, React.js, and RESTful APIs to support critical business operations.
- Engineered robust and scalable solutions, enhancing system performance and user experience.
- Collaborated with cross-functional teams to define project requirements and deliver high-quality software on schedule.

Junior Developer,ITVisionHub Company Limited — May 2024 - Jun 2025

Yangon

- Developed and maintained responsive web applications utilizing modern frontend and backend technologies for diverse client projects.
- Collaborated effectively with cross-functional teams to deliver high-quality software solutions on schedule.
- Optimized application performance and user experience, resulting in enhanced client satisfaction.
- Contributed to all phases of the software development lifecycle, from concept to deployment.

EDUCATION

Bachelor of Computer Science (B.C.Sc),CGPA: 4 — Dec 2019 - Sep 2025

UCSMTLA, Meiktila

SKILLS

- HTML 5
- CSS 3
- JavaScript
- React Native
- Microservices
- Clean Architecture
- RESTful APIs
- Bootstrap
- Tailwind CSS
- React
- C# (ASP.Net)
- Communication Skills
- PHP
- MySQL

Problem-Solving
Laravel
MSSQL
Design Patterns
Domain Driven Design (DDD)
Authentication (JWT, Sanctum)
Teamwork

PROJECTS

Training Management System | Full-Stack Developer — Nov 2025 - Jan 2026

itvisionsoft.com

Tech Stack: PHP, Laravel, MySQL, HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS, Docker, GitHub

- **Designed and developed a training management platform** for managing training programs, courses, participants, schedules, and training-related activities.
- **Designed the system architecture using N-Tier Architecture and SOLID principles** to improve maintainability, scalability, and separation of responsibilities.
- **Developed RESTful APIs and backend modules** using Laravel to support training management and administrative operations.
- **Optimized MySQL database schemas and queries** to improve application performance and reporting efficiency.
- **Built responsive administrative dashboards** for managing training programs, participants, schedules, and training analytics.
- **Implemented Docker-based development and deployment workflows** to maintain consistent environments across development and deployment.

Library Management System | FullStack Developer — Jul 2025 - Aug 2025

Tech Stack: PHP, MVC, MySQL, JavaScript, HTML/CSS, Bootstrap, GitHub, Docker

- **Developed a library management platform** for managing books, categories, authors, members, borrowing records, and library inventory.
- **Designed a scalable MySQL database architecture** to efficiently manage book catalogs, member information, and borrowing transactions.
- **Implemented search and filtering functionality** to help librarians and staff quickly find and manage books and catalog information.
- **Optimized SQL queries and database operations** to improve performance for high-volume catalog and transaction processing.
- **Developed responsive administrative interfaces** using MVC architecture for librarians and staff to manage books, members, inventory, and daily library operations.

Employee Management System | Full-Stack Developer — Mar 2026 - Apr 2026

Tech Stack: ASP.NET MVC, C#, Entity Framework, MS SQL Server, JavaScript, HTML/CSS, GitHub

- **Developed an HR management platform** for managing employee records, departments, roles, leave requests, and employee-related information.
- **Designed and implemented secure backend modules** using ASP.NET MVC and Entity Framework, following structured business logic and data access patterns.
- **Implemented Role-Based Access Control (RBAC)** to manage permissions and restrict access to HR and employee functionalities based on user roles.
- **Developed interactive dashboards and reporting features** to support employee tracking, leave management, and HR operations.
- **Designed and optimized database interactions** using Entity Framework and MS SQL Server to ensure reliable and efficient employee data management.

Food Delivery Mobile Application | React Native Developer — Jun 2026 - Jun 2026

Tech Stack: React Native, JavaScript, RESTful APIs, Appwrite, GitHub

- **Developed a food delivery mobile application** supporting restaurant discovery, menu browsing, cart management, order placement, and order tracking.
- **Integrated RESTful APIs and Appwrite** to manage restaurant, menu, user, cart, and order-related data.
- **Implemented complete ordering workflows**, allowing users to browse menus, add items to the cart, review orders, and track their order status.
- **Built reusable and responsive React Native components** for restaurants, menus, food items, cart screens, and order management.
- **Implemented intuitive mobile navigation and user interactions** to provide a smooth and user-friendly food ordering experience.

Real Estate Mobile Application | React Native Developer — Jul 2026 - Jul 2026

Tech Stack: React Native, JavaScript, Maps API, Appwrite, RESTful APIs, GitHub

- **Developed a mobile real estate application** enabling users to browse properties, search and filter listings, view property details, and explore property locations.
- **Integrated RESTful APIs and Appwrite** for property data, backend services, and application functionality.
- **Integrated Maps API** to provide location-based property information and improve the property discovery experience.
- **Built reusable and responsive React Native components** for property listings, search and filter screens, property details, and navigation.
- **Designed user-friendly mobile interfaces and navigation flows** to provide a smooth and intuitive property browsing experience.

Movie Discovery Mobile Application | React Native Developer — Aug 2026 - Aug 2026

Tech Stack: React Native, JavaScript, TMDB API, RESTful API, GitHub

- **Developed a feature-rich movie discovery mobile application** allowing users to search for movies, browse categories, explore popular titles, and view detailed movie information.
- **Integrated the TMDB API** to retrieve real-time movie data, including titles, posters, ratings, genres, descriptions, and related information.
- **Built reusable and responsive React Native components** for movie cards, lists, search interfaces, category sections, and movie detail screens.
- **Implemented intuitive mobile navigation and user interactions**, providing a smooth browsing experience across different application screens.

Banking System | Senior Software Engineer & Frontend Architect — Jul 2026 - Current

mingalarbank.com

Tech Stack: ASP.NET Core, React, React Native, RESTful API, MS SQL Server, Entity Framework Core, Kafka, Docker, GitHub

- **Architected and maintained a domain-driven enterprise banking platform** supporting customer accounts, fund transfers, loans, and card management.
- **Designed secure domain models and business workflows** for financial transactions, customer data management, data integrity, and high-volume processing.
- **Developed RESTful APIs and responsive applications** using ASP.NET Core, React, and React Native for web and mobile banking operations.
- **Applied Clean Architecture and domain abstraction** by isolating SQL Server, Entity Framework Core, RabbitMQ, email/SMS services, and caching behind domain interfaces.
- **Implemented asynchronous messaging with Kafka** to support reliable communication between application components and background processes.
- **Optimized SQL queries and database operations** to improve transaction performance, scalability, and consistency.
- **Containerized the application stack using Docker Compose**, including APIs, SQL Server, and Kafka, with automated database migration and seeding.
- **Contributed across the full software development lifecycle**, including requirements analysis, architecture, development, testing, deployment, and production support.

Daily Need Items (Multi-Service E-Commerce Platform) | Frontend & Microservices Architect — Mar 2026 - Current

dailyneeditems.com

Tech Stack: Laravel, PHP, Node.js, TypeScript, React, Kafka, gRPC, Docker, GitHub Actions, DigitalOcean, MySQL, PostgreSQL, MongoDB, Nginx

- **Architected and developed a production-ready microservices e-commerce platform** with independently deployable services for products, users, orders, inventory, payments, and delivery across web and mobile applications.
- **Designed event-driven distributed workflows** using RabbitMQ, implementing **Event Sourcing, Event Replay, Event Versioning, Event Ordering, CQRS, and asynchronous service communication** for reliable and traceable business operations.
- **Engineered reliable messaging patterns** including **Transactional Outbox, Inbox, Dead-Letter Queues (DLQ), and Idempotency** to ensure message delivery, duplicate protection, failure recovery, and eventual consistency across services.
- **Implemented resilient distributed-service communication** using **gRPC and REST APIs**, with patterns such as **Bulkhead Isolation, fault handling, retries, and service-level boundaries** to improve system reliability and scalability.

- **Applied Clean Architecture, Domain-Driven Design (DDD), SOLID principles, and modular design** to maintain clear domain boundaries and independently scalable services.
- **Built secure APIs and frontend applications** using Laravel, Node.js, React, and TypeScript, implementing authentication, authorization, validation, and API security across the platform.
- **Containerized and automated the platform** using Docker and GitHub Actions, establishing CI/CD pipelines and deploying production services to DigitalOcean with Nginx.
